

FONADIN continues supporting infrastructure projects

The Mexican President ordered the termination of several public trusts and similar schemes in order to raise funds.*

Due to its importance and characteristics, the National Infrastructure Trust Fund requested the Ministry of Finance to not be terminated.

The Ministry of Finance has authorized for the Fund to continue its functions, which means it will continue supporting infrastructure projects at the federal and subnational level.

The aforementioned represents an opportunity for other trusts to continue with functions they have assigned today.
